Kevin Quartermann	2879	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 02 March 2004.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-15 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-4 and 6-15 is/are rejected.

7) Claim(s) 5 is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on 02 March 2004 is/are: a) accepted or b) objected to by the Examiner.

 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 0304.

4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____ .

5) Notice of Informal Patent Application (PTO-152)

6) Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 8-9 and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Burrows (US 2004/0145089).

3. Regarding independent claim 8, Figure 1 of Burrows shows an electroluminescent panel comprising a release layer (102); a first insulating layer (104) on the release layer; a plurality of lamp layers (106, 108, 110, 112) on the first insulating layer; and a second insulating layer (114) overlying the lamp layers; wherein at least one of the lamp layers includes a UV-cured resin and the remaining layer layers include a heat-cured resin (pg. 12, ¶ [0144]).

4. Regarding claim 9, Burrows discloses the first insulating layer and the second insulating layer including UV-curable resin (pg. 3, ¶ [0039]).

5. Regarding claim 11, Burrows discloses one of the lamp layers being a cascading layer made from a UV-curable ink (pg. 5, ¶s [0059]-[0061]).

6. Regarding claim 12, Burrows discloses the first insulating layer including a cascading dye (pg. 8, ¶ [0092]).

7. Regarding claim 13, Burrows discloses the first insulating layer including a cascading dye (pg. 8, ¶ [0092]).
8. Regarding claim 14, the Examiner notes that the mere duplication of electrodes has no patentable significance unless a new and unexpected result is produced (MPEP § 2144.04 VI (B)).

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 1-4, 6-7, 10, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burrows (US 2004/0145089) in view of Eckersley (US 5,770,920).

12. Regarding independent claim 1, Figure 1 of Burrows shows an electroluminescent panel comprising a release layer (102); a first insulating layer (104)

on the release layer; a plurality of lamp layers (106, 108, 110, 112) on the first insulating layer; and a second insulating layer (114) overlying the lamp layers.

13. Figure 1 of Burrows teaches the limitations of independent claim 1 discussed above but fails to exemplify the first insulating layer and the second insulating layer including low molecular weight PVDF/HFP resin.

14. Eckersley, also in regards to claims 10 and 15, teaches that it is known in the art to provide electroluminescent panels with insulating layers including low molecular weight PVDF/HFP resin for preventing the rear electrode from shorting to an external material (col. 4, ln. 45-51).

15. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the electroluminescent panel of Burrows with insulating layers including low molecular weight PVDF/HFP resin, as taught by Eckersley, for improving the lifetime of the device, since the selection of a known material based on its suitability for its intended use is within the skill of a worker in the art (MPEP § 2144.07).

16. Regarding claim 2, Burrows discloses at least one of the lamp layers including a UV-cured resin and the remaining lamp layers include a heat-cured resin (pg. 12, ¶ [0144]).

17. Regarding claim 3, Burrows discloses one of the lamp layers being a cascading-color layer made from a UV-curable ink (pg. 5, ¶s [0059]-[0061]).

18. Regarding claim 4, Burrows discloses the first insulating layer including a cascading dye (pg. 8, ¶ [0092]).

19. Regarding claim 6, Burrows discloses the first insulating layer including a cascading dye (pg. 8, ¶ [0092]).
20. Regarding claim 7, the Examiner notes that the mere duplication of electrodes has no patentable significance unless a new and unexpected result is produced (MPEP § 2144.04 VI (B)).
21. Regarding independent claim 15, Burrows also discloses a cellular telephone including at least one electroluminescent panel, the electroluminescent panel not including a substrate but is formed on a release layer that is removed and not included in the telephone (pg. 7, ¶ [0078]; pg. 11, ¶ [0120]).

Allowable Subject Matter

22. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
23. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record neither shows or suggests an electroluminescent panel comprising, in addition to other limitations of the claim, at least one bus bar including low molecular weight PVDF/HFP resin and a conductive filler.

Conclusion

24. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bush (US 6,787,993) discloses ink including low molecular weight PVDF/HFP resin. Kosa (US 6,198,216) discloses an EL lamp with improved

interfacial adhesion. Mori (US 5,882,806) discloses an EL element with moisture-proof coated phosphor. Wu (US 6,771,019) discloses EL laminate with patterned phosphor.

Contact Information

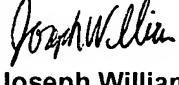

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quarterman whose telephone number is (571) 272-2461. The examiner can normally be reached on M-TH (7-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on (571) 272-2457. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
